

# Franklin Soil Fertility Bio Stimulant Liquid

Franklin Bio stimulant liquid is a 50% concentrate (500g solids per litre) seaweed bio-stimulant which is one of the strongest seaweed products available in the world. The higher concentration of solids in this product leads to higher levels of beneficial substances such as essential trace elements and hormones beneficial to root growth and stress reduction.

Using Franklin Bio stimulant liquid helps to improve size of Root Mass and Depth of Roots, every 1 cm deeper your roots go you access 130 Ton of soil across 1 Ha, therefore improves plant feeding, leading to better Yield, Quality, Plant health, Tiller Survival, Winter Hardness and Stress Reduction.

- Promotes bigger root mass
- Improved water utilisation
- Increased nutrient uptake
- Reduced fertilizer requirement
- Improved disease resistance
- Improved soil biology
- Reduced environmental stress, especially frost
- Increased seed germination
- Non-toxic, environmentally safe
- App rate – 3 L/ha

“Your soil is your most precious resource”

We can help you achieve the best balance to get the best results from your soil, using our Cation Exchange Rebalancing Soil Survey and our expert knowledge.
